

Why your family will benefit from PANACEA®

Liquid nutritional supplements are known to be more readily absorbed by the body than vitamins and minerals in pill form. Panacea®, with ground-breaking intraCELL™ V Technology, is a near perfect match to human cellular makeup. The infusion of over 315 health-giving minerals and vitamins may yield many body benefits.

The pleasant tasting peach-mango flavor is easy for all to swallow, and replaces the handful of pills that many people now take. Children, adults, seniors and pregnant women all may benefit from the improved nutrition provided by Panacea®.

Nutritional Supplement Benefits:

Research shows the following benefits may be derived from taking supplements:

- **Trace Minerals:** cell nourishment, nerve conduction, muscle and organ function, homeostasis (body balance).
- **Vitamins:** overall good health and nutrition
- **Amino Acids:** repair of muscles, organs, nails, hair, skin, ligaments and glands
- **Probiotics:** assist digestion, subdue harmful bacteria, stimulate the immune system
- **Antioxidants:** slow oxidation, for anti-aging and heart health
- **Enzymes:** aid in digestion
- **Essential Fatty Acids:** support cardiovascular, reproductive, immune, and nervous systems
- **Essential Sugars:** fight disease and reactivate immune systems
- **Electrolytes:** regulate nervous system, fluid levels, and pH balance

Panacea contains all of these health-promoting ingredients!

Proprietary "carbon-bond" organic nutrition for the WHOLE family!"

Testimonials

As the mother of 5 year old twin boys, I need all the energy I can get. Since I have been using Panacea, I no longer have the 3:00 p.m. burnout. I feel like I can keep on going with everyone's activities. In my workouts, I have found with Panacea I work out longer and harder and feel healthier all around.

-Lisa Brummer

"I've tried so many supplements, but when I went on Panacea, WOW! What a difference in such a short amount of time. My allergies cleared up, I didn't get that summer time cold, even my complexion is getting better. I have energy that wasn't there before. I love the peach-mango flavor, I give it to my kids, too. I've noticed they seem to be more "focused" and attentive. I'm telling everyone about Panacea."

-Linda Wilson

Each 32oz. bottle of PANACEA® contains: Over 315 nutrients

Delivered by intraCell™ V technology, our proprietary delivery vehicle for vitamins and minerals is comprised of:

Carbon...108,375 mg/l
Oxygen...320 mg/l
Fulvic Acid...7%

intraCell™ V technology is a near perfect match to human cellular makeup, which allows Panacea® to penetrate cell walls carrying over 315 nutrients, including:

- 26 Vitamins
- 65 natural electrolytes
- 71 microcomplexed™ trace minerals
- 12 macro minerals
- 14 probiotics (non-dairy)
- 16 pure plant digestive enzymes
- 26 fruits
- 23 vegetables
- Organic aloe vera
- Essential fatty acids (omega 3, 6, 9)
- 8 essential sugars
- Also, amino acids, natural fibers, bioflavonoids
- 100% Vegetarian

Manufactured exclusively by: Drucker Labs
Distributed exclusively by: MSMI Panacea Distribution

What is PANACEA®?

Panacea® is an all natural liquid nutritional supplement. The product contains more than 315 nutrients that are 100% Organic microcomplexed. This means that all the nutrients have been bound to organic carbon, the very substance that comprises most of the earth's matter. Therefore, Panacea is very homogeneous to the human body. It's liquid form, filled with organic carbon, is extremely well tolerated. It is efficacious and safe for all members of the family. It is vegetarian, drug free, caffeine free, preservative free.

Panacea contains in 100% organic microcomplexed nutrients including 71 trace minerals, all-in-one multivitamin, fulvic acid, enzymes, and much more to provide full nutritional support for the whole family. "Panacea® is the most scientifically advanced, clinically proven, health promoting organic nutritional supplement available today!"†

What type of multivitamin is best for my family?

Organic "Carbon-Bond" Supplements

Modern research supports the assertion that every individual needs a good daily multivitamin as a foundation of health and nutrition. What kind to take is a very important question. There are many types of multivitamins on the market, and there are equally varied messages about what is good. There are a few considerations that are truly important:

- Look for a good quality supplement without binders, synthetics and excipients. These are the agents that are used to manufacture many pills. These agents may be harmful to the body.
- Avoid synthetic vitamins, often Vitamin A (retinol), Vitamin C (ascorbic acid), and Vitamin E (dl-alpha-tocopherol). These are less bio-available (takes more to gain effective dose) and may even be harmful.
- Organic vitamins are higher quality than non-organic.
- Avoid preservatives like potassium sorbate, and potassium benzoate (not recommended for children)

After years of consistent testing, Drucker Labs has determined that most trace mineral products do not contain sufficient quantities of true organics present in the form of organic carbon – as well as other critical organic "carbon-bond" groups which consist of the same organic (living) material of which our bodies are made. Each 32 oz. bottle of

Panacea® takes approximately 30 days of proprietary processing to yield 108,375 mg/l of organic carbon.

Liquids vs. Pills.

There are two fundamental reasons to take liquid vitamin supplements instead of pills.

1. Absorption is the primary reason people select liquids. Some researchers cite up to 5 times the absorption rate of liquids vs. pills. Even if the number were just 2 times, you can effectively halve the amount per serving of ingredients in a pill form vs. the liquid. This is because the body will excrete at least half of what is in a pill. This effectively multiplies the cost per dose by 2 as well.

2. The second reason is more emotional, some people, especially children, just don't want to swallow a handful of pills. If you can find a pleasant tasting liquid, it's much easier to swallow.

PANACEA® does not contain:

Milk, Egg, Fish, Crustacean Shellfish, Treenuts, Peanuts, Wheat and Soybeans, Preservatives, Colloids, Fat, Cholesterol, Wheat, Gluten, Caffeine, Corn, Yeast, Soy, Dairy, Peanuts, Nuts, Fish Oil, Artificial Additives, Artificial Colors, Artificial Flavors, Pesticides, Herbicides, Antibiotics (drugs), Chemicals, Salicylates, Starch, Binders, Fillers, Coatings, Excipients, Flow Agents or Synthetics.

Please consult your healthcare provider or doctor. The statements in this brochure have not been evaluated by the Food and Drug Administration. The product is not intended to diagnose, treat, cure or prevent any disease

Why do I need organic minerals?

"Every ailment, every sickness and every disease can be traced back to an organic mineral deficiency*." "Without organic trace minerals as a carrier, vitamins as well as most all other nutrients are not as effective. Cells cease to function, the immune system weakens, the nervous system deteriorates and the body begins to age more rapidly. True 100% organic minerals and nutrients are absolutely critical to effectively maintain health, promote healing, and prevent many illnesses and disease.

Do I get enough nutrients and minerals from my food?

No – "99% of Americans are deficient in organic minerals because inorganic toxic chemicals, pesticides and herbicides have destroyed nearly all the critical organic minerals, elements, and complexes in our soils. A marked deficiency in any one of the more important minerals actually results in disease."**

Do I get organic minerals and nutrients in most multi-vitamins?

No – and the question isn't if you ingest them, but if your body absorbs and utilizes them. "It is a fact that perhaps only 20% to 25% of most minerals and vitamins you have been taking from commercial products are absorbed by your cells."† This is because they are mostly inorganic (synthetic, dead, toxic), which means these non-absorbable synthetic minerals and elements are generally too large to effectively penetrate cell walls. Therefore, inorganic elements and minerals are maybe of little or no benefit. Moreover, many doctors believe inorganic elements and minerals (i.e. colloidal minerals, coral liquids, etc.) may in fact accumulate in our extra-cellular tissue causing toxicity.

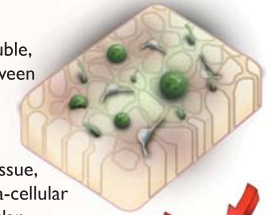

What is an organic trace mineral?

A true 100% organic mineral contains carbon, not inorganic carbonate. When Drucker Labs uses the word "organic" we are not referring to the grocery store definition of the word "organic," which means produced without the use of toxic chemicals, pesticides, etc. We are referring to the more important and true scientific meaning of the word "organic," which is containing "living carbon" NOT dead, synthetic, toxic carbonate. True 100% organic microcomplexed™ carbon-based trace minerals and nutrients can ONLY be obtained from Drucker Labs.

How does intraCELL™ V Technology work?

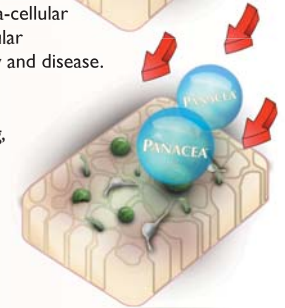

STEP 1

Large Inorganic (insoluble, synthetic) Toxins (between 1 & 100 nm in size) are accumulated over time and stored permanently in fatty tissue, interstitial fluids (extra-cellular spaces), and intra-cellular spaces causing toxicity and disease.

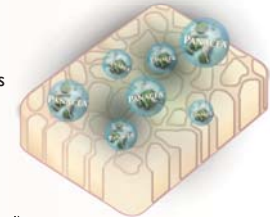

STEP 2

Carbon (organic, living, non-toxic) – instantly attaches to inorganic toxins. There is 144,500 mg/l of proprietary organic (living) carbon in each bottle of – panacea™ - the key!

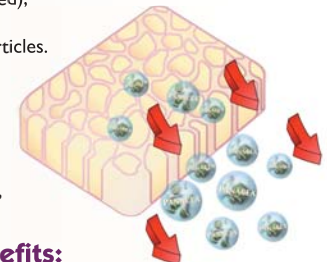

STEP 3

Polymerization Occurs and a new non-toxic polymer is instantly created - inorganic toxins and molecules are broken down into ultra-tiny (ultra-chelated), non-toxic organic microcomplexed™ particles.

STEP 4

Inorganic toxins are released and removed from the body through the skin, urine, and colon.

Your Body Benefits:
maximum energy, strength and well-being!
